Governor Lehman May Call Special Session Of Legislature Soon

Special Session Pending
Address From Washington As to Working of Act Designed to Aid Unemployed and Accomplish Building Program.

Albany, N. Y., June 21 (AP)—The special session of the legislature called by Governor Lehman today is expected to be called soon.

The governor has been non-committal on the subject, pending address from Washington as to the working of the act, which will permit cities to take advantage of the national recovery act loans for public works, he will summon the legislature to Albany before many more days.

3 More States Vote For Repeal; 14 States Now In Wet Column

By the Associated Press.

Long-dry Iowa, with Connecticut and New Hampshire, today brought to 14 the states which in broken succession have voted to knock the Eighteenth Amendment out of the Constitution.

The Hawkeye state's swing away from the position she had maintained for nearly two decades left drys fixing their hope for a halt in the parade on Alabama and Arkansas, both voting July 18.

In the doubtful column when the balloting began, Iowa brought in a substantial majority for the repeal amendment, even though it was not New Hampshire. But with 611,000 votes in, and only 137,000 against, her count was 245,591 for repeal and 242,612 against. That meant she had instructed all of her 93 delegates to the state convention July 19 to vote for repeal.

From the start there had been no question about what New Hampshire and Connecticut would do. The former, with a light ballot and only

one small town missing, voted 75,459 to 30,337 for repeal. In like fashion, Connecticut gave a 4 to 1 majority to the Twenty-first Amendment, which repeals the Eighteenth. Her final, unofficial total was 236,915 for repeal and 35,747 against.

With these three out of the way, Alabama and Arkansas provided the next major battleground. The pros and the antis are concentrating on them, even though California and West Virginia do vote earlier, on June 23.

Drys figure that if they can hold two states this year, the question will be put over until 1934, when their chances will be better. Wets would like to win both Alabama and Arkansas, but agree that it will be close.

After these will come Tennessee, July 20; Oregon, July 21; Texas, August 20; Washington, August 29; Vermont, September 5; Maine, September 11; Maryland and Minnesota, September 12; Idaho, and New Mexico, September 13; Arizona, October 3; North Carolina, Ohio, Pennsylvania and South Carolina, November 7; Nebraska and South Dakota will vote November 6, 1934.

Torrid temperatures spreading over far-flung sections of the nation added to the number of deaths of a record breaking June heat wave.

Away down south in Atlanta, Ga., folks perspired when the mercury climbed to 97 and up north along the shores of Lake Superior at Superior, Wis., it was only one degree cooler.

Summer School For High School Pupils Receives Approval

By the Associated Press.

Kingston High School Summer Session will be held from July 3 to August 22—Students Eligible to Attend—T. L. Culver, Principal.

A summer high school will be conducted in the Kingston High School building from July 3 to August 22, inclusive, according to an announcement of Superintendent of Schools B. C. Van Ingen, who said that the board of education had passed a resolution to that effect, and that the plan had met with the approval of the State Education Department.

T. L. Culver, vice-principal of the high school, will be principal of the summer school.

All students intending to attend the summer school are asked to register on Wednesday morning, June 28, from 8 to 12 o'clock. The sessions of the school will be on every school day, exclusive of holidays from 8 a. m. to 12 noon.

The school is being conducted for three classes of pupils: Candidates for entrance to college in the following September; pupils repeating work in which they have failed, and pupils of exceptional ability who wish to shorten their high school term.

Rules and regulations regarding entrance requirements, the courses to be offered, and what a student may study, may be obtained at the high school building.

On August 22, regents and school examinations will be given in practically all of the subjects taught in summer school. Standings earned in the regents examinations in August may be applied toward a regents academic or college entrance diploma.

Students absenting themselves for five or more days from summer school will be excluded from regents examinations. This is a rule of the regents, and there can be no exception.

40 Depositors of Closed Bank Form Committee To Co-operate With Bank Officials and Terminate Situation

By the Associated Press.

Rev. Father Sanderson Committee of Six Chosen by Representative Group of National Ulster County Bank Depositors in Effort to Advise and Get Action Concerning Present Situation—Reasons for Federal Disapproval of Proposed Plan to Reopen Bank Explained—Depositors Oversubscribed Quota, Stockholders Failed to Subscribe Required Amount.

Some thirty-five or forty depositors more than the amount of this delinquent plan for the re-opening of the bank, apparently, according to statements made at the depositors' meeting, held in the bank situation. Five classifications of notes are known to bank examiners. The first class is the notes upon which collateral is put up and which may be converted immediately to cash. The second is the "excellent" class of note which can be paid in a few days. Third comes the "good" notes which are good but which require time to be liquidated. The fourth class is the doubtful notes, good but given by people with little known standing. Then there is the fifth class of which all banks at times get. They are the notes which are uncollectable or are bad.

Following the last examination of the National Ulster County Bank and Trust Company the examiners made their customary report. The bank was required to cover, before re-opening according to reliable information, the notes in the last two classifications, the "doubtful" and "bad" notes. No mention was made at that time of the "slow" notes which amount to approximately \$300,000.

However when the federal authorities were approached after the last two classifications had been taken care of it developed that before the re-opening authorities would approve of the plan to reopen the bank, the "slow" notes were asked to be cleared up. This is apparently the reason for the present delay.

Bonds held by the bank like all bonds, depreciated in the present uncertain market between the time of the examination of the bank several months ago and the last examination about May. However since the last examination the bonds have recovered and it is believed are now worth more than at the time the plan was proposed for reorganization and consequently the value of the bonds at present cannot be holding up the reopening.

In addition to cover probable variations in market values the department demanded a "cushion" fund of \$100,000. This fund would reasonably cover fluctuating prices in the market. That fund has been met.

It was reported that the depositors did not take up at the meeting Tuesday afternoon the question of the retention of the full banking house office force during the past three months while the bank has been closed to full business and when but comparatively little business could be transacted.

There is a possibility that a depositors' committee may seek an audience with the banking authorities at Washington in an effort to attempt to break the present deadlock. Just what action will be taken on the new demands for the clearing of the \$200,000 in the third class of notes is not known. Individuals might take over these notes and pay up the bank or a corporation might be formed to take over the paper and pay the bank. Such notes as a whole are usually considered a good investment in banking circles.

Crackers Ignited Turntable Ties Boys Shooting Off Firecrackers Set Fire to Ties in O. & W. Railroad Yard—Fire in Sawdust in Old Ice House at Hoffman Brewery.

Tuesday afternoon about 4 o'clock boys were shooting off firecrackers on the turntable in the O. & W. Railroad yard here, and the ties in the turntable became ignited. The fire department was called. Damage by fire was slight.

Rev. Father Sanderson Transferred To Ohio

By the Associated Press.

Rector of Monastery in Esopus Leaves for New Duties in Lima, Ohio—Rev. William McCarty Appointed Rector of Mt. St. Alphonsus.

Word was received today from Mt. St. Alphonsus Monastery in Esopus that the Rev. Thomas Sanderson, C. S. R., rector of the monastery, was leaving this noon for Lima, Ohio, where he will become rector of St. Gerard's Church and also the rector of a missionary band. The Rev. William McCarty, rector of a mission church in Boston, will be Father Sanderson's successor.

For the past 20 years Father Sanderson has been stationed at the monastery in Esopus, where during the last three years he has presided as rector. The Rev. William McCarty, who will take up his duties immediately, has for the past few years been stationed in Boston, but previously was prefect of students and professor of philosophy at the monastery for 13 years.

Father Sanderson, who is widely known for his eloquence, was born in September, 1882, in New York city, where he received his early education in the public schools. As a young man he studied philosophy and theology at Mt. St. Alphonsus. After he was ordained to the priesthood he attended St. Mary's College in North East, Penn., for a year. Then on returning to Mt. St. Alphonsus, he was sent to head a mission band in Saratoga, N. Y., where he remained until the spring of 1918.

Became Rector in 1930
Father Sanderson became rector of the monastery in May, 1930, after he had been there permanently for nearly 12 years, during which time he had become well known throughout this part of the state for his brilliant sermons and discourses.

He will long be remembered by people in all walks of life, and his associates of many years at the institution have been left with heavy hearts. Father Sanderson's striking personality and great accomplishments will long remain as the goal of attainment for the students now preparing for the priesthood.

Father Septon Transferred
The Rev. John Septon, who for the past 15 years has been prefect of students and professor of dogmatic philosophy at the monastery, has been appointed rector of St. Mary's College in North East Pennsylvania. Father Septon left for his new duties Tuesday.

Miss Burnett's Body Goes Home
The remains of Miss Hazel Burnett, who died at the Benedictine Hospital Sunday afternoon, was today shipped by Coroner W. N. Conner by express to the home of her mother, in Live Oaks, Florida.

Funeral will be in Antioch Cemetery at Live Oaks. Miss Burnett would have been 77 years of age in October, having been born October 2, 1916.

Miss Burnett came to Kingston about two weeks ago with Wilfred B. Hancock, 29, of Live Oaks, the two taking a room at 77 Pearl street. She was suffering from septic sore throat at the time and later had her taken to the Benedictine Hospital, where she died on Sunday from pneumonia.

President Halts His Vacation Cruise to Talk on Government

By the Associated Press.

Col. Edward House and Budget Director Lewis M. Douglas Confer With President on His Schooner at Gloucester, Mass.

Gloucester, Mass., June 21 (AP)—On the rolling waves of Gloucester harbor, President Roosevelt interrupted his vacation cruise for a couple of hours this morning to discuss both international and domestic affairs before proceeding on up the coast.

Col. Edward M. House, intimate adviser of President Wilson on foreign problems, boarded the Amberjack II just after Mr. Roosevelt had arisen from a late sleep, making up for yesterday's long haul from Nantucket which ended here just before midnight.

Lewis M. Douglas, director of the Budget, scrambled aboard a little later to talk over veterans' compensation allowances. The Gloucester harbor was a late sleep, making up for yesterday's long haul from Nantucket which ended here just before midnight.

And all the while every conceivable kind of craft from row boat to racing schooners circled about the anchored Amberjack.

Both Colonel House and Director Douglas were vacationing in these parts and Mr. Roosevelt took advantage of the morning rest to talk business with them. Undoubtedly the problems of the London economic conference received attention with Colonel House. Intent upon liberalizing the strict economic regulations first imposed upon veterans, the President and Mr. Douglas talked over ways of doing it and keeping the budget balanced.

New York, June 21 (AP)—Raymond F. Moley, fresh from a sea talk with his chief, packed up this morning and got ready to depart at noon as President Roosevelt's messenger to the Americans at the World Economic Conference.

The Assistant Secretary of State kept his own counsel. There was no statement from him as he arrived yesterday by seaplane from the Amberjack II, which he boarded off Provincetown, Mass.

The smartly dressed professor who has a prominent place in the Roosevelt "brain trust," was expected to confer before departure with Bernard M. Baruch, New York financier, who is a power in the present administration as he was in the years when Woodrow Wilson was at the helm.

Mitchell Case in Hands of the Jury
New York, June 21 (AP)—The case of Charles E. Mitchell, until recently a powerful figure in the banking world, who is charged with defrauding the government of more than \$550,000 in income taxes, was given to a federal court jury today.

More Deaths in the Midwest Heat Wave

By the Associated Press.

Torrid temperatures spreading over far-flung sections of the nation added to the number of deaths of a record breaking June heat wave.

Away down south in Atlanta, Ga., folks perspired when the mercury climbed to 97 and up north along the shores of Lake Superior at Superior, Wis., it was only one degree cooler.

But definite relief was promised by the weather man for some sections of the middle west today as summer made its official debut. Rains which sent thermometer readings tumbling in the northwest yesterday were due to spread to the Central States today.

Wisconsin, with ten deaths attributable to the heat, led the fatality list. Indiana and Michigan had nine each and both Ohio and Nebraska reported three dead. Two drowned in Kentucky and a like number died in Minnesota. St. Louis, with a reading of 96, reported one drowning.

The mercury rose to 96 at Franklin, Pa., and at Pittsburgh it was 91 yesterday, while over the mountains at Philadelphia it was only 82. Baltimore received quick relief when the temperature slid from 93 to 70. With the mercury at 98 for a new all-time June record, Chicagoans looked longingly toward Lake Michigan in anticipation of promised northeast winds.

Hot spots in the nation yesterday were: Lone Rock, Wis., 106; Berlin, Wis., 105; and Durham, N. C., where it was 102 degrees for a new record. A drought was held responsible for damage to the cotton and tobacco crop.

Among the parties is a band traveling in a large sedan bearing an Oklahoma license and another of three women and two men traveling in a Buick sedan with a Connecticut license. Troopers are now following up the latter band, an old Civil War veteran living near Broadhead having pledged to enforce the Sherman Anti-Trust law.

Professor Fetter praised the Anti-Trust act as a "great and beneficent law" which has never been adequately enforced and had always been betrayed. He lamented that the United States had developed a "triumph of bigness," and protested the "dictatorship" of the "new deal."

The Princeton economist held that true capitalism was a benefit to the human race but declared it had been undermined by "corporatism."

Prof. George H. Rea of the Department of Agriculture at Cornell University will be in Ulster county on Tuesday, June 27, to visit beekeepers who want information regarding beekeeping problems. Those desiring to have Prof. Rea stop at their apiary on the about date should leave word to that effect at the Farm Bureau office in Kingston. Those requesting visits need not be members of the Farm Bureau.

Coccidiosis Control In Poultry Explained

According to the Farm Bureau, coccidiosis is the disease which is causing poultrymen much serious trouble, particularly at this time of the year. It causes severe losses, particularly in young birds. In view of this fact, the following information has been compiled by Albert Kurdt, manager of the Farm Bureau, in cooperation with L. M. Hurd of the State College at Ithaca, for the poultrymen of Ulster county.

Coccidiosis occurs in chicks from four weeks of age to maturity but the acute form is especially destructive to young chickens from four to eight weeks of age. It is caused by the presence of a microscopic protozoan parasite which attacks the lining of the intestines. There are six species of coccidia. One species, *Eimeria Tenella*, causes the most acute form of coccidiosis, while the other cause duodenal, or the slower acting forms of the disease. It is thought that only three of the latter species cause coccidiosis in a serious form. The species of coccidia are so closely related that in the prevention and control of the disease they may be considered as one.

The Life Story

In studying ways and means of fighting any disease the first step is to find out how it develops, and what conditions stimulate or retard this development.

The life history of the coccidiosis organism is quite complicated but only the most important parts need be considered. The parasite is taken in with the food and water. Both are easily contaminated in much the same way as the organism is microscopic in size. After attacking the lining of the intestines the organism passes through a number of stages but eventually forms a spore which is known by scientists as an oocyst. These oocysts are resistant to ordinary disinfectants and outdoor conditions. Chickens affected with coccidiosis throw off large numbers of oocysts in the droppings. At the time the oocysts leave the bird's body they are harmless or non-infective, but with proper moisture and temperature they may soon develop to a point where they are infective when taken into the body of the chicken. With moisture and a temperature of about 70 degrees F. development may take place in from two to six days. Where moisture and temperature conditions are less favorable, the oocysts will not develop but remain dormant in the soil for several days, weeks, or months, or from one season to the next. Continued exposure to the sunlight and dryness, however, destroys the oocysts as they are very sensitive to heat and lack of moisture.

Recent Investigations

There is some question at present about the length of time oocysts will remain alive in the soil, but unpublished data of work carried on by the New York state veterinary college at Cornell University during 1932 show that the *Eimeria Tenella* form of coccidia will remain alive in the soil for at least five months even under freezing conditions. Chicks when given food containing samples of contaminated soil. It was also found that lime mixed with the soil is not effective in destroying coccidia, but a thorough drying of poultry manure, or heating, such as might happen if it is kept in piles or pits will destroy the oocysts in a few weeks. Oocysts on the surface of the soil were killed in a few days by direct exposure to sunlight, but those underneath the surface and in shady places where there was moisture, remained alive for the duration of the test. Heat is one of our best means of destroying oocysts.

Recent work in the laboratories at John Hopkins University shows that an exposure to hot water at a temperature of 140 degrees F. killed the oocysts in twenty seconds, while at 176 degrees F. they were killed in three seconds. This is of particular importance of poultry-keepers as the use of boiling hot water provides a cheap and effective destroying agent. However, in practice when boiling hot water is used, at least three applications should be made in rapid succession and the surface to be disinfected should be flooded. This is because the water cools rapidly when it strikes a cool surface.

The use of the fire gun is another and probably a better way of using heat to kill oocysts. With the exception of colloidal iodine most common disinfectants are not effective in destroying coccidia. A three per cent compound cresol solution is fairly effective following a thorough cleaning with a live solution, provided the surface is flooded.

Source of Infection

Severe outbreaks of coccidiosis are more likely to occur in flocks of growing chickens weakened by improper feedings, housing and brooding. The disease is most commonly picked up in some way from adult birds that harbor the germs, or by

A Washington Daybook

By HERBERT PLUMMER

WASHINGTON—It wasn't hard to find out what the members of the House had opportunity to

It was apparent to most Washington observers shortly after the special session was convened that the President intended using the House of Representatives as the dynamo to furnish the power for pushing through his emergency legislative program.

The set-up in the House was ideal for his plans. The democratic majority was overwhelming. The rules of the body were strict, and once invoked, capable of being applied ruthlessly.

Not so with the Senate. There deliberation on legislation is a cherished prerogative. Even President Roosevelt knew it in advance.

Rapid-Fire

So the presidential guns were trained on the House. Literally a barrage of legislative proposals was

running on soil previously contaminated by diseased chickens or from land on which droppings from diseased birds had been spread. The infection may also be carried from one place to another on the shoes or clothing of the attendant, by wild birds, dust-laden wind, utensils for cleaning, visitors, and in other similar ways.

Coccidiosis appears in two forms: The acute type, which is particularly serious in young chicks; and the chronic form which makes its first appearance in the growing flock usually during the last few weeks on range or soon after the birds are housed. The acute form is usually present in the caeca (blind intestines) alone, while the chronic form is confined to the small intestine, particularly in the duodenal loop. In some cases the chronic form may be seen before the chickens are eight weeks old.

Acute Coccidiosis

External symptoms: The first indications of an outbreak of acute coccidiosis in a flock of young chickens is droopiness of a few. The affected birds seem feverish and remain close to the hovel or in groups in the sunshine. They do not eat and they stand with wings drooping, head drawn in, and eyes closed for long periods unless disturbed. This droopy condition may continue for two or three days before deaths occur.

During the early stages of the attack there is usually a watery diarrhea, frequently tinged with blood, which wets all the feathers near the vent.

Internal symptoms: Examination of the intestines often shows the caeca to contain cores of hard blood or bloody fluid. The first two feet of the main intestine, as it leaves the gizzard, may also be greatly inflamed.

Treatment: Most drugs recommended to control coccidiosis have been of little value. The most satisfactory method of controlling an epidemic of the acute form of this disease, when an outbreak occurs, is to use the method recommended by California Experiment Station. This consists of feeding a mash which contains 40 per cent dried milk (40 lbs. of milk in each 100 lbs. of feed). This milk can be added to any mash mixture.

The directions for feeding the special mash are as follows: Start feeding the mash as soon as the presence of the disease is determined and continue for three days; then return to the regular ration for two or three days and repeat the milk treatment if necessary. For best results the birds should eat large amounts of mash. Consequently, the grain fed should be restricted to one-third to one-half the weight of mash consumed.

The use of large amounts of milk acts as a laxative and results in the litter becoming damp very quickly. The fact that large numbers of the coccidiosis organism are likely to be present in droppings makes it extremely important not to neglect sanitation during the period of the epidemic. The following measures are as important as the method of feeding just outlined and should be carried out carefully.

Remove the litter daily and scrape or sweep the floor clean. Where practical the use of a fire gun or other means of disinfecting is advised after cleaning.

Confine chicks to the house for a few days, or move the brooder house to another location, or scrape and plow the ground near the building or cover it with clean soil. The reason for this is to avoid reinfection from soil already contaminated.

Promptly burn dead chicks. Wet spots around the drinking fountains by placing them on wired covered platforms.

Disinfect the fountains daily by scalding with boiling hot water. Cleaning as described above should be continued until the outbreak is over. The feeders used need no attention if properly protected to keep the chickens from contaminating the feed.

Cleaning should continue as described above until the outbreak is over.

Chronic Coccidiosis

Chronic coccidiosis develops slowly affecting only a few birds at a time, but often results in heavy mortality up to and following maturity. Sometimes the best laying pullets in the flock are attacked.

External symptoms: These are loss of appetite, dirty roughened plumage, gradual loss of flesh, paleness of comb and wattles, leg weakness, or paralysis of the legs or wings, and sluggish, weak move-

ment in walking. In bad cases the bird may lie on its breast with one leg extending backward and the other forward.

Internal symptoms: Examination of the first one or two feet of the small intestine next to the gizzard usually shows it to be greatly blood shot. When the intestine is cut open it may roll inside out. It is impossible to be sure that the bird has coccidiosis, however, without the use of a powerful microscope. Chronic coccidiosis is often accompanied by an infestation of microscopic tape worms.

Death from chronic coccidiosis is prolonged and may come after several days or even weeks of sickness. As the bird becomes more weakened its chances of obtaining the proper amount of food is reduced and this often results in the bird dying of starvation.

Control: There is no satisfactory medical treatment for this form of coccidiosis. It is generally considered that more careful rearing and sanitation to prevent exposure to large numbers of the coccidiosis organisms is the best method of control. If rotating the range yearly is not effective in preventing trouble, confinement rearing as explained in Letter 10 may be followed. This method has been helpful in a few cases when the windows as well as the outside porches were screened to keep out insects. The transmission of tape worms by flies and other insects has been demonstrated and in some cases it is probable that coccidiosis is transmitted in the same way.

When confinement rearing is used as a control for coccidiosis, the birds should be confined during the entire period of growth. It is also necessary to reduce the number of birds in the pen to prevent crowding the cannibalism. Plenty of feeding space should be provided so the birds will have sufficient food to develop normally.

In extreme cases when the flock is extensively affected and heavy losses continue, the best plan is to dispose of the whole flock and try a different plan the following year. In flocks less seriously affected rigid culling may help.

The use of drugs and the feeding of large amounts of milk do not seem to work as well with the chronic form of coccidiosis as it does with the acute form. At present the control of chronic coccidiosis depends almost entirely upon proper methods of rearing.

Control by prevention: The following general preventive measures are suggested for controlling both acute and chronic coccidiosis:

Raise chicks in thoroughly cleaned and disinfected brooder houses on clean land separate from old stock.

Keep the litter in the pens dry and change it about every ten days during the first three months of rearing.

Supply all feed in covered or protected non-wasting feeders to prevent contamination by the droppings. Use protected fountains also.

Avoid crowding by limiting each brooding unit to 350 chicks or less. Do not allow more than three chicks to each square foot of floor space. Where birds are confined for several weeks, allow only two chicks to the square foot.

Encourage early roosting to discourage crowding at night.

Avoid extremes in brooder-house temperature. Keep the litter dry.

Place fountains on wire covered frames to avoid moisture on the floor of the house, or use wire covered frames for the entire floor.

Use a platform and dry well beneath automatic fountains on range to prevent wet spots.

Rear chickens in confinement if other methods fail and no clean land is available.

Change brooding ground each year.

Start chicks early in spring (before May 1).

Correspondence Schools

There have been correspondence schools in the United States for about fifty years. The university extension movement in England (1863) called attention to the plan and method, developed in the United States about 15 years later, when the Correspondence University was founded at Ithaca, N. Y. The International correspondence schools at Scranton, Pa., were organized in 1891.

Girl Evangelist Here Thursday

Betty Weckland, aged 17 year old girl evangelist from Cleveland, Ohio, will be the guest speaker at a special service which will be held in St. James Methodist Church Thursday evening, June 22, at 8 o'clock. The youthful preacher is now touring New York state. For the past six weeks she has spoken in a different church and city every night. Her itinerary for this week includes Albany, Hudson, Newburgh, Poughkeepsie, Mill, Kingston, and Poughkeepsie. Betty will sing as well as preach and will be assisted in the service by her father and her 11 year old sister, Dorothy Lola, who sings and plays the violin. The service will be interdenominational in character and everyone is cordially invited to attend. No admission will be charged.

EVENING OF MUSIC AT THE HOME OF MRS. FAYE LE FEVRE.

New Paltz, June 21.—On Friday afternoon, June 16, the younger pupils of Mrs. Faye LeFevre gave a program of spring music at her home on Plattkill avenue. Those taking part in the program were: Marie Jenkins, Philip Denniston, Betsy Lent, Gertrude Osterhout, Viola Vandemark, Shirley Filkins, Roland Johnson, Betty Van Winkle, Gloria Gardner, Howard Van Winkle, Isabel Dunham, Robert Glanz, Mildred Small, Elsa Van Orden.

On Saturday evening, June 17, the Junior Music Study Club of Highland and Music Study Club of New Paltz, which Mrs. LeFevre directs, gave an evening of music at her home. Those of Highland Club were: Rayona Benson, Ruth Haynes, Nancy

than any other car you can buy

YOU can buy a Chevrolet Standard Six for as little as \$445. f. o. b. Flint, Michigan. \$445 for a fine, snappy model of America's favorite make of motor car. \$445 for a Fisher Body car — with the same type of hardwood-and-steel construction as in the very finest coachwork. \$445 for a modern appearing car, not the kind that will look old-fashioned six months from now. Yes—and \$445 for a complete, up-to-the-minute six, with Fisher No Draft Ventilation! Safety plate windshield glass! Genuine mohair upholstery! An Octane Selector! And one of the snappiest, speediest engines that ever powered a six-cylinder car.

And think how easy it will be to pay that \$445! Your old car (if it's of average value) as down payment. Easy monthly installments on the G. M. A. C. plan. And to make these payments even easier, you'll spend less for gas and oil than you would with any other full-size automobile.

Employees of Milk Board May Lose Jobs

Albany, N. Y., June 21 (AP).—Nearly half the employees of the state milk control board which has added \$2,000,000 to farmers' milk checks since April 15, were faced with loss of their jobs today under an order of the Civil Service Commission.

The Civil Service Commission wrote to Charles H. Baldwin, state commissioner of agriculture and chairman of the milk board, telling him that 26 emergency employees given jobs by the board must be replaced by Civil Service workers.

Although Commissioner Baldwin was reluctant to discuss the matter, Henry S. Manley, counsel for the board, said the move would mean the board would have to "start over from the beginning in a large part of its work."

Manley pointed out that the Pitcher milk law, which created the emergency milk board for a period of 11 months, gave it the power to select its own employees within its best judgment.

The 26 employees affected are listed as clerks and stenographers, said, "but many of them are actually doing expert work."

George R. Hitchcock, secretary of the civil service commission, informed Commissioner Baldwin that the civil service commission "now feels that it is entirely practicable to fill the positions of stenographers and clerks from the appropriate eligible lists."

Manley protested on the ground that the milk emergency still exists, that new employees would have to be trained to understand 31 minimum price orders issued by the board, and that the change would hamper the board in checking up on the enforcement of the minimum price orders.

Auction Egg Prices Continue to Advance

The prices of eggs on the Mid-Hudson Egg Auction at Poughkeepsie continued firm with gradual increases from week to week. The top prices on Tuesday were 27 cents which is five cents above the top New York prices. This is accounted for by the exceptionally high quality being sold on the auction.

The range in prices per dozen for the 211 cases sold on the auction Tuesday, June 20, for the various grades offered was as follows:

White Eggs
Large—N. Y. S. fancy, 24 1/2 to 27c; Grade A, 21 1/2 to 26c; producers' grade 18c.
Mediums—N. Y. S. fancy, 20 1/2 to 21 1/2c; Grade A, 17 1/2 to 21c; producers' grade 15 to 16c.
Pullets—Grade A, 15 to 16c.

Brown Eggs
Large—Grade A, 19 1/2 to 20c; Mediums—Grade A, 16 1/2c.

Lawn Party at Hurley.
A cafeteria supper will be held on the parsonage lawn at Hurley, Friday June 23, beginning at five o'clock, for the benefit of the Hurley Reformed Church. If weather is unfavorable, it will be held in the basement of the church. A musical entertainment will be given at eight o'clock.

They Are Great Cacti Collectors

THREE thousand cacti varieties, with sixty new types, are reported in the collection of Howard E. Gates, Anaheim plant collector (right), and W. Taylor Marshall, Los Angeles, who returned to San Diego, Calif., from a three-months' expedition through the desert wastes of Lower California, Mexico. The men told of the hardships of desert hardships, lack of food and unfriendly Indians which had to be overcome in order to obtain the cacti for the Huntington library botanical gardens, San Marino, and for institutions in England, Holland, Italy, Germany and Japan.

MEXICAN BEAN BEETLE DOING MUCH DAMAGE.

According to the Farm Bureau, the Mexican bean beetle is doing much damage to beans in both gardens and commercial plantings. The adult beetles are now laying eggs and in some places the young nymphs are already busy eating the leaves. Thorough spraying and dusting is advised before many young hatch and before the bean pods are fully developed.

The adult beetle is about 1-3 of an inch long, oval in shape and pale yellowish to brown in color with eight spots on each wing cover. The young are yellow and are clothed with stout spines.

For controlling this pest the Farm Bureau recommends the following materials: For spraying (with liquid) one ounce of magnesium arsenate in three gallons of water or 1/2 ounce of calcium arsenate mixed with 1 1/2 ounces of hydrated lime, and added to three gallons of water. For dusting (with dry powder) use one ounce of magnesium arsenate thoroughly mixed with five ounces of hydrated lime or one ounce of calcium arsenate mixed with seven ounces of hydrated lime. The beetles do most of their feeding on the lower surface of the leaves. It is therefore important to get as much of the poison on the lower side of the leaves as possible.

Too Tall for Brooklyn Bridge
All large naval vessels which pass under the Brooklyn bridge have to lower their topmasts to go under the bridge. The height of the bridge is 127 feet, 11 inches.

THE JOINERS

News of Interest to Members of Fraternal Societies

Camp No. 30, P. O. of A., meeting will be held tonight at 8 o'clock in Mechanics' Hall. Visiting members and the national vice president, Slater Roberts, of Albany, will be present.

Prince of Asturias Married Commoner

Heir to Spanish Throne Renounces Rights as He Weds Edelmira Sampedro, Beautiful Daughter of Rich Cuban Merchant.

Luzanne, Switzerland, June 21 (AP).—Alfonso, former Prince of Asturias, was married in the city hall today to Edelmira Sampedro, beautiful daughter of a rich Cuban merchant. For her love he renounced his royal rights as heir to the Spanish throne and took the name of Count Cavadonga. The exiled King Alfonso, who dreams of a day when the Bourbons may return to the throne, remained at Fontainebleau, France, adamant in his opposition to the marriage.

The marriage hall at the Municipal Building was especially decorated with flowers for the civil ceremony, which was to be followed later today by the religious rites in the Sacred Heart Church at Ouchy, Switzerland.

The royal disapproval of the match had all but banished great Spanish names from the list of guests. The former prince chose as his witness, Duke Manuel Almadova, a Spanish grandee and the only member of the old court circles present.

The bride's witness was her brother-in-law, Martino Arguelles. Fearing the disapproval of the elder Alfonso, many Spanish monarchists invited sent their regrets.

The former queen sent word through friends that her heart was with her son in his love match.

Local Fruit Is Being Harvested

The picking of cherries, both sweet and sour, is now in full swing. The strawberry harvest is practically over due primarily to the extremely dry weather and early raspberries are being picked. Currants are rapidly ripening and the picking will start in a week or ten days.

The peak of the cherry crop will soon be here and the housewife desiring to purchase cherries for preserving, should begin to look for them. Many were disappointed in not being able to get local strawberries due to the exceptionally short producing period. Tree fruits are not affected by dry weather as quickly as strawberries but the harvest does not last very long.

The commercial production of fruit is concentrated in the southern part of the county, but cherries are available in most sections. Large cherry orchards are found in Marlborough, Milton, Highland, Uster Park, New Paltz and Saugerties with scattered smaller orchards in other places.

ARDONIA
 Ardona, June 21—The local ladies who attended the annual Home Bureau picnic which was held on the spacious lawn of Mrs. Myron Seymour in Ardona last Thursday, were Miss Emma Palmer, Mrs. Elmer Palmer and daughter, Marian, Mrs. Eber Coy, Mrs. Ira Hyatt and Mrs. Orville Seymour.

The Home Bureau meetings will be discontinued during the months of July and August. Activities will be resumed in September. An interesting program has been outlined. Mrs. George Ahlstrom of this place has been selected to attend the international school and lead at the community sing, which begins in November and to be continued each month of the year. Mrs. Orville Seymour of this place and Mrs. W. Courter of Modena were again requested to attend the training school in Kingston, lessons to be given on planning "New meals from home grown foods, or attractive meals from what have you." These leaders are to teach these lessons in the community. There will also be a news writing school in Kingston. Mrs. Eber Palmer of this place, Mrs. Myron Shultz and Miss Glennie Wagner of Modena will attend these meetings. Mrs. Frank Black of Modena was chosen dramatic leader and Mrs. Jonah Rhodes and Miss Irene Sickler were chosen leaders in the modern method of housecleaning.

More Woman Voters
 Barcelona, Spain, with a population of 1,008,732, has 50,000 more women voters than men.

The WORLD of STAMPS

By Quinlan James.
 Several times announced and as often postponed, the Vatican series has appeared at last. As reported previously, the 12 values range from 5 centimes to 20 lire, including two express stamps.

Most interesting from the pictorial point of view are the 30, 75 and 60c, showing the Vatican gardens and, in the far distance, the dome of St. Peter's.

The portrait of the Pope on the 1, 2.25, 2 and 2.75 is reproduced much more clearly than is usually the case with stamp pictures.

San Marino Surcharge.
 In honor of a philatelic convention held there last month, the republic of San Marino surcharged two values of a 1932 issue "Convegno Filatelico" down the right hand side and "28 Maggio 1932" down the left. The 1.75 becomes 1.75 and the 2.75 becomes 2.75 centimes. Apparently, the issue chosen was the one commemorating the inauguration of the new general post office.

England Plans Change.
 Of wide interest to the collecting world is the news from England that Sir Kingsley Wood, postmaster general, plans "some minor changes in design, possibly in color" in Great Britain's stamps early next year. That country is known as being decidedly conservative in stamp matters. The issued now in use dates from 1912, and there have been only three commemorative issues in British history—the Queen Victoria jubilee issue of 1887-92, the British Empire exposition issue of 1924 and the postal union congress issue of 1929.

There is the further distinction that the pictures of only three persons—Queen Victoria, King Edward, King George—have appeared on the stamps.

Aid To Collectors.
 For the convenience of stamp collectors the post office department has ruled that documentary internal revenue stamps may be obtained by mail, accompanied by cash or money order, from postmasters at all first and second class post offices and at all third and fourth class offices located in county seats.

CHILDREN'S DAY PROGRAM

IN NEW PALIZ M. E. CHURCH

New Paliz, June 21—The Children's Day program was given in the Methodist Episcopal Church Sunday morning, June 18, at 10:30. The program proceeded without announcement as follows: Processional, the whole school; invocation, the pastor, the Rev. Robert L. Mauster; stock: song, "The Church," Pauline and Frank Vandemark; recitation, "Seen and Not Heard," Muriel Hedges; recitation, "These Summer Days," Geoffrey White; recitation, "A True Story," Eloise Elbert; song, "Such A Splendid Secret," Primary Department; recitation, "Beauty Everywhere," Loren Linacre; exercise, "The Earth Is The Lord's," Mrs. Ida Stephen's class; recitation, "A Bear Story," Elton, Herbert and Wesley LeFevre; song, "Praise Him," Primary Department; recitation, "A Job For Everyone," Edward Veverke; recitations (a) "The First Commandment," Miss Linacre's and Miss Hasbrouck's classes; (b) "The Twenty Third Psalm," Mrs. Ida Stephen's class; (c) "The Books of the Bible," Miss Carolyn Teaple's class; song, "Came A Little Child Like Me," Primary Department; cradle roll recognition, each little member present was presented with two or more pink carnations; one baby was baptized; hymn by the congregation and responsive reading, an order of service for Children's Day, presentation of pageant, "The Golden Chord," characters—Mother church, Henrietta Wicks; Education, Forest Hasbrouck; messenger, Robert Mauster; stock, Jr. Page, George Wicks, Jr.; Peace, Violet Schmalkaueck; Woman, Frances Brown; Temperance, Samuel Kevan; Chinese Spokesman, Muriel Ingraham; Indian Spokesman, Mildred Small; Friendship, Joseph Linacre; Minister, Harold Decker; teacher, Margaret McCormick; Business Man, William Hasbrouck; Doctor, Margaret Wicks; Plenty, Gertrude Small; others in the cast included Dorothy McCormick, May Ella Ingraham, Faith Mack, Helen Verberka, Rose Inge, Mary Jane Hasbrouck, Evelyn Hasbrouck, Lorraine Hedges, Helen Crane, Albert Smith, Frances Hasbrouck, Jean Ford and a few others.

WEST CAMP.

West Camp, June 21—Mr. and Mrs. Thomas Gaudy of Alen called on Mr. and Mrs. H. Krom last Thursday.

Mr. and Mrs. Harold Steenbur and Helen Krom spent Sunday in Catskill.

Foster Winchell is driving a new Mack truck.

Mrs. James Morse, Mrs. H. Coz and Mrs. John Wynne spent Friday at Forest Hills.

Gardeners Trounce Herzogs, 12 to 4; Cragan Hits Homer

After battling hip and neck for six innings the Hills Gardeners were no longer in the last inning to score seven runs and outscored Herzogs' Hardwarers 12 to 4, at the Athletic Field Tuesday evening. The victory put the Gardeners in a virtual tie with Schryvers for second place in the City League and, although it is impossible for them to come in on top, they still have a chance of gaining second place in the first half.

Harold "Johnny" Johnson started the Gardeners off in their winning rally with a single to center field. Joyce followed with another single and Hawkins drew a pass to fill the sack. Schwab, pinch-hitting for Fraleigh, drove Johnson home with a single to left field. Messenger hit Wood, who booted, allowing Joyce and Hawkins to scurry home. Tierney scored Messenger at second base and Johnson singled to score Schwab and Tierney. Joyce received a walk and then Johnson hit a double to score Cullum and Moore. It was Johnson's second hit of the inning.

Paul Joyce was the winning pitcher. He allowed eight hits, issued two walks and hit one batsman. Ken Williams pitched for the losers and was found for 13 hits. He handed out six walks and hit one batter.

A rally, climaxed by a triple off Joyce's bat, netted the Gardeners three runs in the first inning. Hits by Cullum and Moore and a walk to Messenger gave the Gardeners another run in the second inning.

Hank Cragan manufactured a run all by himself when he patterned a home run over Fleming's head in right field in the fifth inning.

The Hardwarers' runs came in the second and fifth innings. They scored three in the second and one in the fifth.

SIDELINERS

With Cragan's homer went the box of King Stone cigars donated by the Medicine Chest.

Bill Schwab showed a lot of speed after hitting his single in the big rally. He forgot that runners were on the paths and ran Hawkins off second base. But after a little confusion on the part of the Hardwarers all hands were safe.

Vox Pop: The Repeaters' protest of the Herzog game, which ended in a tie, was upheld and the Repeaters now have won eight and lost one. In the second half Fred Hahn and Dick Dulin will replace Joe Carr and Jimmy Gorman, present umpires. The second half will start Monday if the first half is decided tonight. On Friday, July 14, the American Legion will have the field and no league game will be played.

The score:

Gardeners	AB.	R.	H.	PO.	A.	E.

Herzogs	0	8	.000

Repeaters Play Schryvers Tonight

What may be the deciding game of the first half of the City League will be played at the Athletic Field this evening when the Morgan Repeaters and Schryvers' Lumbermen meet. The Repeaters are holding a big lead over the rest of the pack and need this game to clinch the first half. A loss for them will still leave them in the lead, a full game ahead of the Lumbermen, but will make it possible for the Lumbermen to tie them. If Schryvers do win this game they will have to win their remaining two games, which would cause a deadlock and necessitate a playoff. Ted Fraleigh, who has won most of the Repeaters' games, will be on the mound with Joie Hoffman behind the plate. Bill Thomas, recently returned from Springfield College, will oppose Fraleigh. His receiver will be Jack Robins.

Tennis Tournament At Woodstock Club

The Woodstock Country Club will sponsor a men's double tennis tournament on Saturday and Sunday, June 24 and 25 on the Country Club courts. All those wishing to compete should have their names in by Thursday morning, June 22, at 10 o'clock but late comers will be fitted in if possible.

Tennis balls will be supplied by the club and prizes will be awarded to the winners.

Play will start at 10 a. m. June 24, but in case of rain at 10 a. m. June 25.

Tagging Major League Bases

By HUGH S. FULLERTON, JR.
(Associated Press Sports Writer.)

New York's two baseball clubs, the Giants and the Yankees, appear ready to sink or swim together this season. And the danger of their sinking is not to be regarded lightly.

When the Giants moved into the National League lead on June 4, they started the first stretch of an appreciable length in six years that two clubs from the same city have topped the major leagues. Now it appears more than likely that they will go down at the same time.

Twice in the past few days the Yankees have turned aside the Washington threat just in the nick of time. Today their margin was only one game and the Giants had only half that lead over the St. Louis Cardinals.

It was Babe Ruth who led the Yankees out of danger yesterday and paced them to a 15 to 8 victory over the Chicago White Sox when a defeat would have thrown them into a tie with the idle Senators for the American League lead. The Babe climbed out of a sick bed to take part and promptly made the Chicago fans wish he had remained there by clouting his fifteenth homer as a major part of the seven run rally in the sixth inning that put the game away.

The Giants, after ringing up two straight shutouts against their old rivals, the Chicago Cubs, went down to 5-3 defeat. Bud Tinning and Burleigh Grimes collaborated on a good pitching job for the Cubs. St. Louis neatly mowed a game off the Giants' lead by trouncing the Brooklyn Dodgers, 15-4, gathering 17 hits.

Including homers by Leo Durocher and Joe Medwick in the eighth inning when they scored eight runs. Pittsburgh's Pirates beat the Boston Braves 6 to 2 for their fourth straight victory as Bill Swift pitched six hit balls and the Bucs put over five runs in the third. The Phillies took two games from the Cincinnati Reds, 7-4 and 7-3. A 16 hit assault enabled Johnny Jackson, former University of Pennsylvania flinger, to win his first major league start, with ease and 15 more blows, including Chuck Klein's 13th homer, won the second battle.

Although out of the Philadelphia Athletics snapped their losing streak with a 9-4 triumph over Detroit and broke their fifth-place deadlock with the Tigers. The Boston Red Sox pounded Delve Bean hard in the last innings and downed the Cleveland Indians again, 9 to 5.

YESTERDAY'S STARS

(By The Associated Press.)
Joe Medwick, Cardinals—Hit double and home run in same inning against Dodgers.

Jimmie Fox, Athletics—Hit Detroit pitching for triple and three singles.

Bill Swift, Pirates—Held Braves to six hits to win 6-2.

Bill Dickey, Yankees—Clouted home run, triple and single against White Sox.

Burleigh Grimes, Cubs—Limited Giants to one hit in three innings in relief role.

Dale Alexander, Red Sox—Led attack on Indians with double and three singles.

Wes Schumacher and Chick Fullis, Phillies—Made six hits apiece in doubleheader against Reds.

WRESTLING LAST NIGHT.

(By The Associated Press.)
New York—Joe Savoldi, 200.

Three Oaks, Mich., threw Paul Boesch, 200, Brooklyn, 27-63.

Vines Seeded First For Wimbledon

London, June 21 (AP).—Ellsworth Vines of Pasadena, Calif., American and British titleholder, headed the seeded list for men's singles in the all-England tennis championships, starting at Wimbledon next Monday, when the draw was made today.

Seeded behind Vines, who will be defending the title he won last year, were Jack Crawford of Australia, Henri Cochet of France, H. W. (Bunny) Austin of England, Clifford Suter of New Orleans, Fred Perry of England, Jiro Satoh of Japan, and H. G. Lee of Singapore.

Helen Wills Moody, defending champion in women's singles was seeded first in that department. Following her were Dorothy Round and Margaret Scriven of England, Mme. Rene Mathieu of France, Helen Jacobs of Berkeley, Calif., Hilda Krackwinkel of Germany, Mlle. J. Jedrzewska of Poland, and Lolette Payot of Switzerland.

Vines' principal opposition in the upper quarter of the draw will come from Perry and Don Turnbull of Australia. Cochet was drawn in the second quarter with Lee, Hans Timmer of Holland, Vivian McGrath of Australia and H. Kinzel, Australia.

In the third quarter with Austin were drawn Satoh, L. Hecht of Czechoslovakia and Adrian Quiet of Australia. Crawford, in the last quarter, will have to contend with such players as Sutter, G. P. Hughes of England, Christian Bousquet of France and Bela Von Kehrling of Hungary.

Legion Juniors Trim Olive Bridge

The Junior baseball squad of the American Legion won its last practice game from Olive Bridge, 8-2, Tuesday night on the Fair Grounds, before entering the Ulster County elimination series for the championship. The boys turned in a good evening's work and Manager Ed Goughlin of the locals feels that the Kingston pennant will be flying high when the county elimination has ended.

The official county schedule will be issued this week. Four teams: Kingston, Phoenixia, Ellenville and Wallkill will comprise the circuit. Saugerties will not enter the league this year, and since the village was the great boulder in the Kingston path, it leaves the way clear for the locals.

Connelly Plays Perry All Stars

The Connelly A. C. will clash with the Perry All Stars tonight at 6 o'clock on the St. Remy diamond. This is expected to be one of the best exhibitions of the season thus far.

Both teams have equal reputation. The Connelly A. C. is conditioning itself for the high light of their season on the Fourth of July when the Port Ewen firemen will offer opposition in a game which will settle a question as to which team should be considered the best in that section.

FIGHTS LAST NIGHT.

(By The Associated Press.)
Cleveland—Patsy Perroni, Cleveland, outpointed Johnny Risko, Cleveland (10); Charley Belanger, Canada, outpointed Eddie Simms, Cleveland (10); Al Gatchell, Lorain, O., outpointed Gene Stanton, Cleveland (6); Jackie Davis, Cleveland, outpointed Fred Fitzgerald, Youngstown, O. (6); Frankie Wallace, Cleveland, outpointed Jimmy Vaughn, Cleveland (6); Teddy Tarozzi, East Liverpool, outpointed Sammy Slaughter, Terre Haute, Ind. (10).

SPORT SLANTS

By ALAN I. COULD
(Associated Press Sports Editor.)

Harvard hasn't captured a single varsity boat race this spring at the so-called sprint distances for eight-oared crews, but all will be forgiven if the Crimson carries its main objective again—the four-mile pull down the Thames river against Yale on the evening of June 16.

The fact that Harvard would rather beat Yale at anything than anybody else is, of course, not news. But this manifestation becomes something of an obsession when it appears the Crimson readily sacrificed any prospect of victories over other rivals all spring in order to develop a distance-racing crew.

It is as though the Harvard crew coach was taken aside and instructed as follows:

"Young man, build a crew that will beat Yale at four miles. Never mind what else happens. You won't be expected to win early races. The undergrads and old grads will forgive and forget everything else if Yale is beaten in the varsity race at New London."

Great Named Cassidy

Maybe it wasn't even necessary to dictate any such program to Charles Whiteside, the former Syracuse star who has coached crews that now have two straight varsity victories over Yale and hope to make it three straight this month.

For one thing there's a husky young Kent named Gerard Cassidy stroking this Harvard crew he won't be in there pulling to win all the way, you don't know your Cassidy's from Harvard. He's a square-jawed youth with lots of power and fortitude.

Cassidy's freshman crew beat Yale and he has paced two varsity boatloads to triumph over Old Eli. It may be fortunate for Yale there is a limit, even to what a Cassidy can do.

Still the Blue isn't without hope and is a first-rate outfit, undefeated over the same preliminary stretch in which the Crimson failed to record a single victory. Yale finally stopped Barry Wood, their football Nemesis, and may break the Cassidy jinx.

All The East Has Left

The New London Regatta is the East's one big rowing show of the year, with Poughkeepsie off the calendar and the climax of the season booked for the Olympic lagoon at Long Beach, California.

Some of those palatial yachts and plutocratic trimmings may be missing along the Thames river anchorage this year, what with so many of these luxurious playthings still in drydock for one reason or another, but nothing can alter the naturally picturesque setting of the Yale-Harvard regatta. It's an all-day picnic and reunion.

The course wanders leisurely down from Bartlett's Cove, past the submarine base, to the railroad bridge across the Thames at New London. From the observation train, glimpses of the racing crews are cut short by trees, hills and buildings, as well as the boats anchored along the course.

It's like trying to follow the Grand National steeplechase, just a little uncertain and baffling until the very last, when the train pulls out on the bridge to see the shells coming head-on over the last quarter-mile.

There's generally a thrill in that finish, whether the blue or crimson tipped oars are flashing in front, and this year should mark no exception.

Major League LEADERS

(By The Associated Press)
(Including yesterday's games.)
National League.

Batting—Klein, Phillies, .359; Martin, Cardinals, .358.

Runs—Martin, Cardinals, 51; Bartlett, Phillies, 41.

Runs batted in—Klein, Phillies, 54; Bottomley, Reds, 42.

Hits—Fullis, Phillies, 91; Klein, Phillies, 89.

Doubles—Klein, Phillies, 21; P. Waner, Pirates, and Medwick, Cardinals, 18.

Triples—Martin, Cardinals, 8; P. Waner and Suhr, Pirates, 7.

Home runs—Klein, Phillies, 13; Berger, Braves, 12.

Stolen bases—Martin, Cardinals, 9; Frisch, Cardinals, Davis, Giants, and Fullis, Phillies, 8.

Pitching—Hallahan, Cardinals, 8-2; Carleton, Cardinals, and Cantwell, Braves, 8-3.

American League.

Batting—Simmons, White Sox, .366; Chapman, Yankees, .364.

Runs—Gehrig, Yankees, 58; Fox, Athletics, 51.

Runs batted in—Gehrig, Yankees, 59; Simmons, White Sox, 56.

Hits—Manush, Senators, 91; Simmons, White Sox, 83.

Doubles—Sewell and Cronin, Senators, 19.

Triples—Combs, Yankees, 10; Manush, Senators, 7.

Home runs—Gehrig, Yankees, 16; Ruth, Yankees, and Fox, Athletics, 15.

Stolen bases—Walker, Tigers, 14; Chapman, Yankees, 10.

Pitching—Allen, Yankees, 5-1; Hildebrand, Indians, 16-3.

AIR CURRENTS ARE NOW MADE VISIBLE

French Scientist Reveals New Research Plan.

Paris.—Another scientific revelation occurred recently in the College of France when a profound exposition by the physicist, Professor Magnan, demonstrated the optical determination of air currents.

The air that surrounded the scientists present, that flowed through the windows or moved about their papers and hands, could be seen clearly, if subjected to certain simple conditions, Professor Magnan's paper indicated.

Heretofore, the study of air currents always was carried on through coloration, such as introducing gases or smokes easily visible to the naked eye. Professor Magnan demonstrated that the air itself, without any other changes than its own elements, could be studied with sufficient accuracy to be of great practical value, especially in aviation and in the study of bird flight.

The visibility of air currents, according to Professor Magnan, can be studied in the simplest manner by the injection of a warm-air current into a cold area of ambient air, or the introduction of a chilled current into the warm air of a room.

Professor Magnan's experiments were conducted in his laboratory with the use of a hot-air current set in motion by the combination of an electrical heater, back of which was an ordinary hair dryer. The blower of the hair dryer propelling already warmed air through the red-hot wires of the little heater projected a steady current through the much cooled ambient air in the laboratory.

To make this column of air visible Professor Magnan placed before it a nonsilvered mirror and a low candle-power lamp of not more than six volts. The propelling column of warm air could be observed easily in the pale light. The professor declared currents could be measured, observed and followed in their reactions.

Beauty Treatment Given Last Year's Potatoes

Salt Lake City.—Throughout the ages, since its discovery in South America by Spanish invaders, the lowly potato has been classed as an honest vegetable—the poor man's friend. But it may be a poor deceiver.

Evidence that the spud sometimes leads a double life was uncovered here by David F. Smith, state commissioner of agriculture.

Try as they would, the "new potatoes" offered for sale in many markets here this spring, failed to deceive Commissioner Smith. Many housewives had been fooled, however, and that aroused the ire of the commissioner.

He found that potatoes posing as youngsters actually were old-timers, hiding their age behind makeup, face-paints and things like that.

It was discovered that the name "new potatoes," in some instances, meant merely that last year's potatoes had been washed, treated with a weak solution of lye, dried and brushed so the outer layer of skin disappeared while under layers were roughened in resemblance to early 1933 potatoes.

Unintended buyers paid fancy prices for the potatoes believing that they had been shipped here from Texas, California or Mexico.

Texas Judge's Right to Grant Divorces Upheld

Austin, Texas.—Couples in southwest Texas granted divorces by Judge A. M. Kent of One Hundred and Third District court are resting easier as a result of a decision of the State Supreme court in the only divorce ever appealed to it. The Supreme court decided that Judge Kent had the right to grant divorces, although the state legislature, in creating a Criminal District court for the same territory, attempted to put all divorce cases in the Criminal court.

Fireman Puts Knife on Seat, Now He Can't Sit

Cedar Falls, Iowa.—A fire alarm startled Chief James Peterson as he was wielding a large kitchen knife on some foodstuffs. In his haste to answer the call he tossed the knife into the seat of the truck, then jumped aboard and sat down on it. Several stitches were required to close the resulting wound. The fire was merely a chimney blaze.

Puss Put on Spot by Butcher Birds

Palo Alto, Calif.—The owl and the pussy cat dwell in harmony, as
